

VBS 3000 VINYL BENDING SYSTEM

VBS 3000 VINYL BENDING SYSTEM

The **VBS 3000** is designed to give manufacturers the ability to bend vinyl extrusions and create any type or style of arched window. The versatile **VBS 3000** can accommodate round arches, extended arches with sides, segmented arches and elliptical shapes and, you can bend radii as small as 12 inches.

Simple Operation

Designed for maximum productivity and ease of use, the **VBS 3000** requires just one operator to perform the entire procedure. The flexible, low voltage electro magnetic radius control fence minimizes set up time.

Performance & Reliability

The VBS 3000 has been engineered for maximum performance and durability. The technology employed by the **VBS 3000** is state of the art and takes a minimum of floor space. The entire footprint of the standard 12 foot configuration is just 12 x 6 feet, which includes the fluid tank for the non-toxic vinyl heating system.
